

(OPTIONAL) Resources: Dapp Standards

Week 4, Lesson 2 Resources

The following resources were selected to provide an overview of the topic of Dapp Standards. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

Title of resource: [The difference between App Coins and Protocol Tokens](#)

Resource type: website

Description: When the ERC20 Token was conceived, this small but useful building block was immediately replicated and assembled into crude systems that have steadily increased in complexity and utility over time.

Title of resource: [If you don't understand blockchain, maybe these cats can explain it to you](#)

Resource type: Website

Description: In this CNBC web article, Everett M. Michelle Castillo explains how CryptoKitties is a "cryptocollectable" game where people collect digital cats with specific traits, which can be used to breed other digital cat. Cryptokitties runs on Ethereum and it is an ERC721 compliant token.

Title of Resource: [ERC 20 Token Standard](#)

Resource type: Website

Description: The github repository for the ERC 20 token standard.

Title of Resource: [ERC 721 Token Standard](#)

Resource type: Website

Description: The github repository for the ERC 721 token standard.

Title of Resource: [EIP Ethereum Improvement Proposal](#)

Resource type: Website

Description: The github repos for Ethereum Improvement Proposal (EIP).
