

# (Optional) Resources: Linux's Hyperledger

## Week 1, Lesson 1 Resources: Linux's Hyperledger

The following resources were selected to provide an overview of the topic of Linux's Hyperledger. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

### Title of Resource: [About Hyperledger](#)

Resource Type: Website

Description: Hyperledger is an open source collaborative effort created to advance cross-industry blockchain technologies. It is a global collaboration, hosted by The Linux Foundation, including leaders in finance, banking, Internet of Things, supply chains, manufacturing and Technology.

### Title of resource: [Hyperledger tutorial](#)

Resource type: Website

Description: Hyperledger Composer is an extensive, open development toolset and framework to make developing blockchain applications easier.

### Title of Resource: [What is Hyperledger? Brian Behlendorf Explains the Linux Foundation's Blockchain Initiative](#)

Resource Type: Video (2:15)

Description: As the executive director of Hyperledger, a distributed ledger initiative from The Linux Foundation, Brian Behlendorf leads a blockchain collaboration between leaders in finance, banking, supply chain, manufacturing and technology. Its membership includes IBM, JPMorgan Chase and American Express, among others.

**Title of Resource:** [Hyperledger Fabric](#)

Resource type: Website

Description: Hyperledger Fabric delivers a uniquely elastic and extensible architecture, distinguishing it from alternative blockchain solutions.

**Title of Resource:** [An introduction to Hyperledger Fabric from The Linux Foundation](#)

Resource Type: Video (2:23)

Description: IBM is a contributor to the Hyperledger Fabric project owned by the Linux Foundation. It is the first project in Hyperledger to be given 'Active' status meaning it has followed certain requirements and been tested in the real world.

**Title of Resource:** [Microsoft And The Blockchain: MSFT's Big Projects](#)

Resource type: Website

Description: Microsoft's offering of “[Blockchain as a Service \(BaaS\)](#)” on Microsoft Azure was started to enable enterprise clients and developers have a single-click cloud-based blockchain developer environment.
