

(Optional) Resources: Composer

Week 1, Lesson 4 Resources: Composer

The following resources were selected to provide an overview of the topic of Composer. We would like to acknowledge the authors of the various web articles, videos, and papers for their insightful discussions and analytics which help formed the basis for some sections of the lessons and modules.

Title of resource: [Hyperledger Composer](#)

Resource type: Website and Video (4:22)

Description: Hyperledger Composer is a set of collaboration tools for building blockchain business networks that make it simple and fast for business owners and developers to create smart contracts and blockchain applications to solve business problems.

Title of resource: [What is Hyperledger Composer from The Linux Foundation with Dan Selman](#)

Resource type: Video (6:08)

Description: What is Hyperledger Composer? It's a suite of high level abstractions for business networks. It helps build a blockchain with an emphasis on business-centric vocabulary quickly and easily.

Title of resource: [Hyperledger Composer Modeling Language](#)

Resource type: Website

Description: Hyperledger Composer includes an object-oriented modeling language that is used to define the domain model for a business network definition.

Title of resource: [Model and test your blockchain network](#)

Resource type: Article

Description: This tutorial gets you started developing a blockchain network.
